## EXPERIENCE

### **F22 Labs, Remote** — *Sr. Product Developer*

FEBRUARY 2015 - PRESENT

I am leading the technology efforts to build [SkyMD](#). SkyMD enables dermatologists based in US to provide quality care to their patients anytime, anywhere virtually.

1. Co-built API based on Ruby on Rails to serve our Angular web portal and hybrid mobile applications.
2. Built hybrid SkyMD [iOS](#) and [Android](#) apps from scratch based on Ionic framework. We have also made this app accessible on web.

### **Freshdesk , Chennai** — *Product Developer*

JULY 2014 - FEBRUARY 2015

Freshdesk is an enterprise platform for customer support on cloud.

I was a part of the Fresh Apps team where we developed a marketplace for developers to write and publish plugins, themes and server side applications.

### **Fab.com, Pune** — *Software Engineer*

JUNE 2012 - JULY 2014

Fab.com is a flash sales website based in US. I was responsible for developing Consumer facing features primarily on Ruby on Rails.

Following highlights major projects that I undertook there.

1. Navigation and Content localisation to support multiple languages when Fab.com expanded to Europe.
2. Sub-navigation hovers for easy browse and discovery.
3. Dynamic product pages to support product grouping by sizes and materials/colours.
4. Fab's email services that involved sending campaigns, transactional emails, personalized recommendation emails, localization of emails based on user preferences, analysing open rates and click throughs.

## TECHNICAL SKILLS

Ruby, Ruby on Rails 3.x -4.x, Sinatra

Javascript, jQuery, AngularJS 1.x, Ionic 1.x

HTML, CSS, SCSS, Bootstrap, Angular Material

MySQL, Redis, Solr, Memcached, Elasticsearch

Git, SVN, AWS, Heroku

## FIELD SKILLS

**Estimating** the timeline of a project/feature by breaking it down into micro level tasks.

**Phasing** out the delivery of a product/feature by breaking it down into multiple and manageable releases.

**Leading and nurturing** a development team towards a positive attitude and best engineering practices.

## SOFTWARE IDEOLOGY

Fail faster,

Shipping beats perfection,

It's simple until you make it complicated.

## **August Infotech, Surat — PHP Developer**

NOVEMBER 2011 -MAY 2012

August Infotech is a service based company. As a PHP developer, I was responsible for adding features to a SAAS based ERP product. This product encapsulated features such as leave management tool, salary tool, ledger reports, sales etc.

## **EDUCATION**

### **Birla Institute of Technology and Science, Dubai Campus**

JULY 2007 - JULY 2011

Graduate with a BE (Hons) Computer Science CGPA 7.5

## **EXPECTS**

Love,  
Equality,  
Trust,  
Less meetings  
And more Coffee :)
